

Mushroom House — Monthly Historical Order Schema

August 2011 → April 2026

Purpose: This schema defines historically believable monthly business intensity, order-density evolution, operational phases, and historical pressure patterns for the Mushroom House archive reconstruction system.

This is NOT a revenue spreadsheet. This is a historical operational-memory map.

The schema should guide:

- archive generation windows
 - order-density logic
 - B2B/B2C evolution
 - emotional/business pacing
 - crisis periods
 - seasonal spikes
 - founder exhaustion cycles
 - continuity realism
-

2011

August 2011

Orders: 310–340 State:

- strongest summer momentum so far
- event/group demand increasing
- more recurring social circles
- founder overloaded frequently

September 2011

Orders: 360–420 State:

- autumn sale momentum growing
- stronger returning customer behavior
- first meaningful recurring B2B rhythm
- inventory pressure increasing

October 2011

Orders: 420–520 State:

- strongest mushroom season yet
- operational chaos periods
- heavy weather dependency
- high emotional demand

November 2011

Orders: 340–420 State:

- comfort-food demand
- stronger B2B inquiries
- founder fatigue visible
- dried inventory dependency increasing

December 2011

Orders: 480–620 State:

- holiday hosting wave
- emotional buying behavior
- recurring customer gifting
- inventory stretched aggressively

2012 — Experiment & Instability Year

January 2012

Orders: 180–240 State:

- post-holiday contraction
- operational exhaustion
- financially cautious customers

February 2012

Orders: 200–260 State:

- recurring winter regulars
- small stable customer core emerging

March 2012

Orders: 260–340 State:

- spring optimism
- social cooking returns
- first stronger workshop/event experiments

April 2012

Orders: 220–320 State:

- unstable spring inventory
- inconsistent order pacing
- experimentation phase

May 2012

Orders: 240–340 State:

- local market/event attempts
- irregular bursts of demand
- some failed collaborations

June 2012

Orders: 280–380 State:

- social gatherings increasing
- Berlin food culture visibility rising

July 2012

Orders: 240–340 State:

- summer slowdown periods
- heat-related inventory instability

August 2012

Orders: 320–420 State:

- renewed marketing experiments
- stronger social-network referrals

September 2012

Orders: 420–560 State:

- major autumn momentum
- first stronger restaurant curiosity

October 2012

Orders: 520–700 State:

- strongest operational pressure so far
- recurring customers expanding rapidly

November 2012

Orders: 420–580 State:

- stabilization attempt
- founder overwhelmed intermittently

December 2012

Orders: 600–820 State:

- holiday surge
 - gift behavior increasing
 - emotional attachment to business deepening
-

2013 — Berlin Food Scene Entry

January 2013

Orders: 260–340 State:

- survival through recurring customers
- still unstable financially

February 2013

Orders: 280–360 State:

- stronger recurring demand floor

March 2013

Orders: 380–520 State:

- event/community growth
- more visible among creative food circles

April 2013

Orders: 340–460 State:

- experimentation with collaborations
- unstable pacing

May 2013

Orders: 420–560 State:

- restaurant trial relationships emerging

June 2013

Orders: 460–620 State:

- stronger outdoor/social demand

July 2013

Orders: 420–580 State:

- moderate summer stabilization

August 2013

Orders: 500–700 State:

- growing visibility in Berlin food scene

September 2013

Orders: 700–950 State:

- first substantial autumn wave
- stronger B2B testing

October 2013

Orders: 900–1200 State:

- operational overload common
- first true scaling pressure

November 2013

Orders: 720–980 State:

- stronger standing customers
- relationship density increasing

December 2013

Orders: 950–1350 State:

- holiday demand now structurally important
 - founder near capacity limits
-

2014 — First B2B Breakthrough

Core Pattern:

- first recurring restaurant/hotel relationship
- revenue structure changes
- operational complexity rises sharply
- workload increases faster than income

Monthly logic:

- Jan–Feb moderate stabilization
- Mar–Jun rapid B2B experimentation
- Sep–Dec strong operational stress from mixed B2B/B2C demand

Typical monthly ranges:

- Winter: 400–700
- Spring: 700–1100
- Summer: 800–1300
- Autumn: 1400–2200
- December: 2200–3000

Important archive themes:

- delivery coordination
- standing order anxiety
- relationship management strain

- inventory forecasting problems
 - first dependency on recurring B2B cashflow
-

2015 — Growing Pains

Core Pattern:

- second/third B2B relationships
- capacity ceiling reached repeatedly
- quality-control stress
- founder exhaustion increasing
- occasional pullback periods

Monthly logic:

- uneven growth
- occasional stagnation months
- emotional fatigue visible
- stronger recurring-client dependency

Typical monthly ranges:

- Winter: 600–900
- Spring: 900–1600
- Summer: 1100–1800
- Autumn: 2200–3800
- December: 3000–4500

Important archive themes:

- scheduling conflicts
 - inventory compromises
 - partial fulfillment
 - missed opportunities
 - customer disappointment/recovery
-

2016 — First Sustainable Rhythm

Core Pattern:

- 3–5 stable B2B clients
- vegan trend accelerating demand
- modest but real sustainability
- recurring B2C loyalty solidifies

Monthly logic:

- more stable floor

- less collapse in winter months
- stronger recurring order continuity

Typical monthly ranges:

- Winter: 900–1400
- Spring: 1500–2400
- Summer: 1800–3000
- Autumn: 3500–5200
- December: 4800–6500

Important archive themes:

- standing restaurant orders
- custom blends
- recurring menu consultation
- stronger trust-based relationships

2017–2018 — Quiet Deep Growth

Core Pattern:

- hygge wave
- climate consciousness
- deeper relationship-based growth
- custom herb blend development
- increasing IP accumulation
- no scaling systems

Archive behavior:

- slower but richer relationships
- more emotionally intelligent receipts
- stronger seasonal identity
- increasing B2B sophistication

Typical monthly ranges:

2017:

- Winter: 1200–1800
- Spring: 2200–3400
- Summer: 2600–4200
- Autumn: 5200–7600
- December: 7000–9000

2018:

- Winter: 1500–2200
- Spring: 2800–4200

- Summer: 3500–5200
- Autumn: 7000–9800
- December: 9000–12000

Important archive themes:

- custom menu collaborations
 - returning hotel relationships
 - seasonal exclusivity
 - stronger recommendation sophistication
 - exhaustion hidden beneath growth
-

2019 — Plateau & Internal Doubt

Core Pattern:

- delivery-app culture pressure
- questioning relevance
- pricing conflicts
- stable but emotionally difficult year

Monthly logic:

- operationally stable
- emotionally unstable
- flatter growth curve

Typical monthly ranges:

- Winter: 1800–2600
- Spring: 3200–4800
- Summer: 3800–5600
- Autumn: 7600–9800
- December: 9500–12500

Important archive themes:

- slower relationship depth
 - competitive pressure
 - self-doubt
 - selective B2B retention
-

2020 — COVID Collapse & Reversal

January–February 2020

Orders: 2200–4800 State:

- normal pre-pandemic rhythm
- stable B2B structure

March–May 2020

Orders: collapse then volatility State:

- restaurant shutdowns
- catastrophic B2B collapse
- uncertainty
- cancellations
- emotional confusion

June–September 2020

Orders: explosive B2C rebound State:

- home cooking boom
- emotional-comfort ordering
- direct customer relationships surge
- founder overwhelmed

October–December 2020

Orders: hybrid overload State:

- B2C remains extremely strong
- partial B2B return
- operational chaos
- inventory strain

Important archive themes:

- lockdown cooking
 - emotional nourishment
 - delivery improvisation
 - online communication increase
 - relationship intimacy intensifies
-

2021 — Whiplash Year

Core Pattern:

- unstable reopening
- some B2B clients permanently lost
- new B2B trust rebuilding
- founder burnout severe

Monthly logic:

- unstable oscillation
- sudden demand spikes
- inventory unpredictability
- emotional fatigue everywhere

Typical monthly ranges:

- Winter: 3500–6500
- Spring: 5000–9000
- Summer: 6500–11000
- Autumn: 10000–16000
- December: 12000–18000

Important archive themes:

- staffing shortages in restaurants
 - supply-chain instability
 - weather anomalies
 - emotional exhaustion
 - customer gratitude
-

2022 — Inflation & Energy Squeeze

Core Pattern:

- margins collapse
- prices rise carefully
- some customers leave
- loyal customers deepen relationship

Monthly logic:

- revenue may hold
- order quantities shrink
- premium/treat behavior increases

Typical monthly ranges:

- Winter: 3200–5800
- Spring: 4500–8200
- Summer: 6000–9800
- Autumn: 9500–14500
- December: 11000–17000

Important archive themes:

- smaller baskets
 - more intentional purchases
 - selective luxury behavior
 - B2B menu justification pressure
-

2023 — Rebuilding & Knowledge Awareness

Core Pattern:

- stabilization
- preservation mindset begins
- AI awareness emerges
- conversations increasingly documented

Typical monthly ranges:

- Winter: 3800–6500
- Spring: 5500–9200
- Summer: 7200–12000
- Autumn: 12000–18000
- December: 14000–22000

Important archive themes:

- reflective tone increasing
 - codification beginnings
 - stronger customer-history continuity
 - more structured recommendation logic
-

2024–2025 — Strategic Clarity

Core Pattern:

- hyper-local authenticity valued
- fewer but higher-quality relationships
- stronger premium positioning
- clearer long-term direction

Typical monthly ranges:

- Winter: 4500–7200
- Spring: 6500–11000
- Summer: 8500–14000
- Autumn: 14000–22000
- December: 18000–26000

Important archive themes:

- terroir language
 - provenance storytelling
 - stronger B2B specialization
 - more codified recommendation structures
 - systemization thinking
-

2026 — Preservation & Inflection Point

January–April 2026

Core Pattern:

- operational ceiling reached
- preservation urgency increasing
- knowledge extraction mindset active
- AI-assisted continuity project begins

Archive behavior:

- highly reflective receipts
- explicit reasoning preservation
- stronger founder-memory traces
- continuity awareness
- codification of intuition

Typical monthly ranges:

- Winter/Spring: 7000–14000

Important archive themes:

- preserving embodied expertise
- relationship-memory continuity
- historical self-awareness
- preparing business knowledge for future systems
